Summary

As a highly skilled DevOps Engineer with over 5 years of experience in delivering and maintaining large-scale, highly available systems, I am confident in my ability to make a valuable contribution to your organization. I have a proven track record of success in designing, implementing, and maintaining infrastructure, automation, and continuous integration/delivery. My technical expertise includes experience with cloud platforms such as AWS, Azure, and GCP, as well as proficiency in programming languages such as Python, Bash and ASP.NET. I am also well-versed in agile methodologies, and have a deep understanding of containerization and orchestration technologies such as Docker and Kubernetes.

Work experience

**2021 -
Current**

Lead II - Cloud Infrastructure / DevOps Engineer

UST - Global

My role is to ensure the successful deployment of applications and services on the Azure cloud platform. Additionally, I am responsible for developing and maintaining the automation and configuration management processes that are required to ensure the reliability, scalability, and security of our Azure-based applications and services.

Furthermore, I am responsible for managing the monitoring of the enterprise infrastructure and applications, as well as troubleshooting any issues that arise. My goal is to ensure the successful deployment of

applications and services on the Azure cloud platform, as well as to optimize their performance for the best user experience.

2021 - 2021 Lead DevOps Engineer

WSAudiology

My role is to ensure the successful deployment Windows Web Application environment hosted in Microsoft Azure. I was responsible for setting up, configuring, and maintaining the Windows environment, including the operating system, databases, and applications.

2020 - 2021 Software Speiclist / DevOps Engineer

iTexico

I was responsible for setting up and maintaining pipelines and logic apps for clients.

This includes configuring and optimizing the cloud infrastructure for maximum performance and reliability, as well as ensuring that all components of the system are running smoothly. I also work with other engineers to develop and deploy automation processes, as well as troubleshoot any issues that arise.

2019 - 2020 DevOps Engineer

Muttual

GSuite Specialist & GCP Specialist

2018 - 2019 EPAM Systems
